Brief Report of Language Laboratory

(2014-15 to 2018-19)

The English Department of K.R.A. College offers English as a compulsory/special/optional and additional subject to the students of B.A., B.Com. And B.Sc. courses. Technology-mediated task-based group activities, classroom presentations, discussions and workshops in addition to teaching by lecture, peer learning: project / report writing and periodical assessment are part of the program. The Department of English is a vibrant department in the college as it continuously organizes various literary and language activities throughout the year. It keeps pace with the important changes that have been taking place in English as a subject and language of communication. The Department of English boasts of having the departmental library with a rich collection of titles related to English literature and language as most of the books were purchased under the Minor Research Projects carried out by the department members.

The well-equipped & sophisticated English Language Laboratory established in our college offers English proficiency programs. In the fast changing socio- economic scenario at the global level the importance of English as a medium of communication both oral as well as written has become a known fact. The conventional class room teaching, for all practical reasons, prepares the students more for the examination and generate in students language consciousness.

Objectives:

The objective of the language laboratory is to develop and refine the language skills of our students. It has its own software packages for training the students. The Language Lab focuses on the production and practice of sounds of language and familiarizes the students with the use of English in everyday situations and contexts.

These objectives are as follows:

1. To expose the students to a variety of self-instructional, learner-friendly modes of language learning.
2. To help the students cultivate the habit of reading passages from the computer monitor, thus providing them with the required facility to face computer-based competitive exams.
3. To enable them to learn better pronunciation through stress on word accent, intonation, and rhythm.

4. To train them to use language effectively to face interviews, group discussions, public speaking.
5. To initiate them into greater use of the computer in resume preparation, report writing, format-making etc.
6. To help the students make their communications more effective.
7. To motivate the students to use English in day to day life without any complex.
8. To create a milieu that is conducive to learning English.
9. To expose the learners to the sounds, accents, and intonation of English to make their English Intelligible.
10. To develop functional skills in the students.

Features of Language Lab:

1. Highly Sophisticated and self-contained language lab with 17 computers.
2. Offers easy integration with course curriculum.
3. Provides scope to learn spoken English directly from the native English speaker.
4. Encompasses listening and speaking skills with emphasis on pronunciation.
5. Helps in enriching vocabulary.
6. Allows self-paced learning and self-assessment.

Knowledge Bridging Course 2014 to 2019

Introduction

A bridging course is an interdisciplinary course to all the new comers in First year class. After completion of 12th Science, they have only basic background of knowledge in the science subjects.

For the science graduation the students have a vast number of options to choose subjects hence sometimes they confused to choose the subjects for the graduation. It's a duty of the subject teachers bridge the gap of knowledge in a particular course, to guide them, remove their phobia among the subject and make them more interested in their ~~interested~~ in the concern subject. Grades must be based on tested performance, and must signify skills adequate for university-level courses which demand essays and/or essay type examination.

The duty of a teacher is a preparation course with an academic curriculum that is offered to students as a means of preparing for the intellectual challenges of a university education, successful completion of which is recognized as a basis of admission to the college. Academic Standards, Curriculum and Pedagogy should be informed of any decisions regarding the university-preparation courses.

Objectives of the Course-

Bridge course was commenced at the beginning of the semester to the students who were identified by a preliminary test in the subjects like Zoology and also through their participation in the regular classes. Initially students are not comfortable in the new environment. They fill insecurity and that can be led to psychological barrier to learning. To address this we created a secured haven for learning. As human beings have innate zeal to learn throughout their life, more so at young age, which should not be stemmed.

The staff of the zoology department feels this obligation to provide congenial learning ambience where learning happens naturally. We, at our college wished to adhere to this lofty ideal by providing an ambivalent scaffold through bridge course, which helped students, mingle with others happily and they could carve a

niche for themselves in the campus by developing their own unique identity. This created an active learning environment that made the students tap their innate energies and channelized them towards the destiny.

The Bridge course for the subject zoology is made them comfortable with transformation of knowledge of zoology. Learning style adopted by them, which eventually developed into a skill of their forte. Through this course, an ecstatic learning background paved way to a positive learning environment in the class where active participation was seen from every end.

According to the norms of Savitribai Phule Pune University, Our Department of Zoology of Karmveer Ramraoji Aher Arts, Science and Commerce College have specific criterion every year for all the first year science students who are chosen the zoology as a subsidiary subject. The department is also taking the care of student of second year students and third year students who chose zoology as a special course. After completion of admission process the staff of the zoology in the first week of the academic year advises the students regarding the difficulties and scope of the subject that how the Zoology becomes a carrier oriented course for them. The department also provides facilities of computer and internet to the students to make the study oriented atmosphere. The year wise activities and their evidences are as follows-

At first he asked some questions about Biology because at 12th Science level they studied only studied Biology. He explained about separation of the subjects as a Botany and Zoology. Further he explained Zoology Paper 1st Animal Systematics and Diversity, Zoology paper 2nd Cell Biology and Genetics and 3rd Practical Course to complete each for the 100 marks. He further told the distribution of Marks as per University norms for the each zoology subject.

Prof. Dr. V. K. Wahule conducted was also conducted the oral test (Zoology Aptitude Test)

Prof. Dr. C. D. Saokar was talked on the interesting and magical things to the students, to remove the phobia of Zoology. He also told how to make zoology more easy and eco-friendly.

As far the new comers for the subject Zoology for the first year and the students who are interested to choose zoology as a subsidiary subject, every year in July month once the classes starts, soon after the department invites almost all the zoology subject students in the department.

On 02/07/2015 the department of Zoology Conducted the meeting with all the new students for the discussion on the zoology subjects for first year and the mark distribution. Because up to 12th science level students don't know about separation of courses, the only know Biology as a single course. So to avoid the confusion among the students Prof. Dr. V. K. Wahule had given the briefings of all the three separate courses of Zoology each for 100 marks.

As far the first year Science students is concern, the new comer students had called to gather in the department on **09/07/2019** at 12.30 noon for the discussion on all the three zoology subjects. The oral test of the students was taken by asking the simple and basic questions. Prof. Dr. S. N. Bhamare had given the simplest way of understanding the zoology. He also explained the separation of Biology as a Botany and Zoology. The course zoology is again classified in three courses and each will be for the 100 marks. Prof. Dr. V. K. Wahule had given the guidelines of examination. Prof. S. V. Pawar advised them that the department is always open and the staff is always ready to solve the problem regarding the study, notes and providing computer and internet to make better study.

For the second and third year science classes the confused students were identified during the lecture hour by asking some questions. The staff the department solved their confusions regarding the subject and advised them to take the help of any teacher of the zoology for ICTs, Notes and any other difficult problem of the subject.

Like every academic year the staff of the Zoology department suppose to be the duty of bridging course solve the problems of the students because as far the first year science when the students took their admissions and choose the subject zoology they always confused about the number of courses, titles of courses and syllabus in the course with mark distribution in the particular course. For that in every first week after the completion of admission process the students advised about the knowledge and scope of Zoology subject.

On 15 July the one bridging course was organized in the classroom for the 1st year science students. Initially some oral questions were asked to the students during the lecture hour. Prof. Sunil N. Bhamare explained about the entire three courses, two for theory and one for practical. Prof. Dr. V. K. Wahule had given the briefings of the syllabus and distribution of subject work load for the teaching staff. This activity is to make subject more easy and eco-friendly for the students.

Knowledge Bridging Course 2018-19

Date- 03/07/2018 to 07/07/2018

Like every year in the first week after admissions for the first year science students are called to attend the bridge course to minimize the gap of knowledge between +2 level and first year science about basic zoology. Along with this the course also bridges the illiteracy of rules, students' code of conduct and understanding various etiquettes and manners in the college premises.

At schools, education is imparted to students by holding hands, and at plus 2 levels (or in intermediate college) education is forced, where the students do not remain as students but are treated as consumers by the junior colleges but the inherent talent of the students is never encouraged or recognized.

The bridge course is an ideal weapon to step out from the cocoon and enter them into professional courses. The university education is taught by broad manners in this condition the students may under stress. At this moment, they need positive intervention from institution side to put them on right track otherwise they become rudderless and are unable to reach the milestones what they set for themselves.

As per the norms of the teaching the lesson plans are also time bound, faculty could not focus on the slow learners during their regular teaching hours. It resulted in losing the interest and enthusiasm in the subject. Sustaining the student motivation can't be compromised due to the above limitations. At times student perception and institution perception towards education style may not match. In this scenario progressive minded students immediately follow the policies of the institution, where as predetermined students are rigid, and it is a time taking process for them. In the meanwhile they will get stressed to cope with others, does not involve in the curriculum. Few do not show interest towards assignments given and others do not recognize the value of assignments and tasks given during the classes. The risk is, slowly the habit of studying can be dwindled. In such a case to sustain the interest of the students, a facilitator faculty of zoology subject come into picture and puts their efforts to behold the interest of the students in the subject through a bridge course.

The faculties of the Zoology Department also press on the communication skill. The college is located in rural, tribal and hilly area, students have Vernacular background. Hence there is a need to be taught English because all courses' medium of instruction is English. A budding degree holder should be armored with two essential skills of communication they are speaking and writing. There should not be any barriers in communication. He/she should master the skill of communication by avoiding mother tongue interference in their language. This in turn helps them in securing placements also.

Our college is affiliated to Savitribai Phule Pune University, Pune. University prescribed three subjects of zoology for studies. If they do not succeed in the first year, they miserably fail in all related academics like Chemistry, Botany, Physics or Geography.

Success of the course adopted at the entry level for the graduates of B. Sc. and how it improved the academic performance of the learners.

Prof. S. v. Pawar, Prof. Dr. S. N. Bhamare and Prof. Dr. V. K. Wahule were taken the lectures on Scope of the Zoology, Need of Study and Branches of Zoology. Prof. Dr. S. N. Bhamare and Dr. V. K. Wahule also discussed on English communication and advised to learn and try to speak English.
